Father Matters

DIGITIAL NAVIGATOR PROGRAM

ABOUT THE PROGRAM

The ***Father Matters*** digital navigator program is a solution to address both digital access as well as learning and upskilling. Our goal is to ensure parents and students receive on-demand tech support and relevant information to secure connectivity, devices, as well as access to foundational digital skills, learning and training opportunities.

If you are in need of assistance with addressing internet connectivity issues, helping locate and setting up hotspot wireless networks, help with locating and applying for affordable internet services, understanding on how to use equipment, some software applications *(e.g. Teams, Zoom, WebEx, Parent/Student Vue, Microsoft Office, Email accounts, etc.).* We also offer those in need with tablets, computer webcams and jump drives to allow students and parents to participate in virtual learning and for parents to be accessible to their student's education.

GIVE US A CALL
